EyeQuestion 4 Major Changes

Abstract

Major changes between the Classic and the New Interface

Rignald Span
rignald@eyequestion.nl

EyeQuestion 4

As some of you may have noticed, a new version of our software suite has been released. Not only is there a major change in its aesthetic properties, we have also made the software more user-friendly. The purpose of this document is to go through some of the differences between the now classic and new interface to make the transition from old to new as smooth as possible.

Choosing your interface

Upon installation either the classic or the new interface has been set as a default. EyeQuestion users are free to choose if they would like to work in the classic or the new interface. Click on your user avatar, located in the top right corner, to switch back to the classic interface.

In the classic interface, the switch to the new interface is located next to the log out button.

Users can also choose which lay out will be used for the respondents by going to the project settings and selecting the user interface per project.

Old interface

New interface

Saving your changes

Another big difference is the absence of the save button when creating a project as all changes will be automatically saved. The **Save** button is still present in some instances, such as the edit user screen.

Creating projects

When creating a project in both the classic and the new interface you can choose from our list of predefined templates, copy a project, copy an archived project or use your own custom templates. The predefined templates have been restructured and there are also some new templates available for you to use.

Move projects to another folder

If you want to move projects to another folder, it is now possible to move them in the main menu. You can drag and drop undeployed or closed projects in the folder structure of the main menu.

Editing your questionnaire

Adding, editing and removing questions and screens has been expanded and simplified in the new interface.

Users now have the option to select multiple screens or questions to move or delete them.

Single questions or screens can be placed elsewhere by simply dragging and dropping them to a new position.

Users are able to view the results of the changes on screen in real time due to the addition of the edit pane, located in the middle of the screen. Editing your question can be done by clicking the question in the center pane.

The drag-and-drop system has also been implemented in the questionnaire as questions can be easily moved to and within the edit pane.

You can quickly go through your questionnaire by clicking on the arrows on top of the pane.

Question settings have been grouped together and sorted to make editing a question more user friendly. Please note that depending on the question type, not all settings are available.

Question items

Editing question items has been made easier as items can be added by entering the display name and clicking the ENTER button.

TYPE CATEGORY

Question

Type

<input type="checkbox"/>	black	1
<input type="checkbox"/>	with sugar	2
<input type="checkbox"/>	with milk	3
<input type="checkbox"/>	with sugar and milk	4
<input type="checkbox"/>	None of the above	

To edit the item value, the field must first be unlocked by clicking on the  icon. The icon will change to indicate that the field is unlocked and a value can be altered . The values that can be changed will also change color, turning from grey to teal.

<input type="checkbox"/>	black	1
<input type="checkbox"/>	with sugar	2
<input type="checkbox"/>	with milk	3
<input type="checkbox"/>	with sugar and milk	4
<input type="checkbox"/>	None of the above	5
<input type="checkbox"/>	Add Item	

Deleting items can be done by clicking on the  icon, which will add  icons next to the item values. To remove an item, click the  icon.

<input type="checkbox"/>	black		1
<input type="checkbox"/>	with sugar		2
<input type="checkbox"/>	with milk		3
<input type="checkbox"/>	with sugar and milk		4
<input type="checkbox"/>	None of the above		5
<input type="checkbox"/>	Add Item		

Items can be rearranged by dragging them to a new position using the drag handle.

<input type="checkbox"/>	banana
	orange
<input type="checkbox"/>	strawberry

Custom questions

Custom questions can now easily be saved by clicking on the  button. Clicking this button will show a pop up screen where the user gets the option to either overwrite an existing custom question or save the question as a new question template.

Custom questions can be accessed by clicking on Add Question + and opening the subfolder.

 Custom Questions

Editing screens

Editing your screen settings can be done by clicking on the pencil icon on top of the edit pane. All options from the classic interface are available such as timers, close session, redirect etc. If you only want to change the screenname you can also edit the name on top of the edit pane.

SCREEN Intro ✎

Welcome \$\$user:fullname\$\$ to this COFFEE test.

Before we start the test, we would like to ask you a few questions.

Screen Intro

Standard settings —

Close Session	<input type="checkbox"/> ✕
Feedback	<input type="checkbox"/> ✕
Screen	<input type="checkbox"/> ✕
Auto Submit	<input type="checkbox"/> ✕
Logoff Screen	<input type="checkbox"/> ✕

Conditions

Screen conditions are located on top of the edit pane and can be accessed by clicking on the  icon.

The number next to the conditions icon will indicate the amount of conditions on that specific screen

Print page

The print page is not available in the new interface anymore. However, all items from the print page can be found at the export page.

Product colors

The experimental design now uses colors to indicate your products. Colors are used to highlight individual products and sessions.

DESIGN SETS

Set	Sequence Number	Product Number	Blinding Code	Replica	Session
SET 1	1.	2	234 ☆		S1
	2.	3	790 ☆		S1
	3.	1	460 ☆		S1
SET 2	1.	3	790 ☆		S1
	2.	1	460 ☆		S1
	3.	2	234 ☆		S1
SET 3	1.	1	460 ☆		S1
	2.	2	234 ☆		S1
	3.	3	790 ☆		S1

Export options that are available in the classic interface on the design page have been moved to the Export page in the new interface.

Add images to your user accounts

Images and signatures can now be added to users in EyeQuestion, they can be used in reports. The avatar image is also used as a profile picture in the top right hand side of the screen.

Questionnaire layout

The layout of the questionnaire has also been improved, adjusting it to new interface layout and color scheme and making it easier to work with.
